

• ConPackSys - your reliable partner •

- *Underground storage compressor system based on: two Ariel compressors, each driven by a 2 MW variable speed electric motor.*

- *Depletion compressor system based on: a direct driven 14.700 rpm (VSDS) centrifugal compressor with magnetic bearings.*

- *Offshore compression module based on: two Ariel compressors, each driven by a 1 MW caterpillar gas engine.*

• ConPackSys - for compression solutions •

- *Offshore booster compressor skid based on: a nonlube Ariel compressor driven by a 900 kW variable speed electric motor.*

- **ConPackSys, your engineering partner** for tailored gas Compression Systems and Packages. Our experience in serving the oil&gas- and process industry worldwide goes back to 1976.

- Since then ConPackSys has built numerous reciprocating and centrifugal **compression systems**, up to: 40MW, sweet-, sour- or process gas, discharge pressure 600 bar(g).

- **ConPackSys is your partner from start to finish:** engineering, manufacturing, installation and commissioning: **for a job well done!**

- **ConPackSys B.V.**
